Introduction to Atomic Design

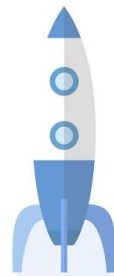

01

What is Atomic Design?

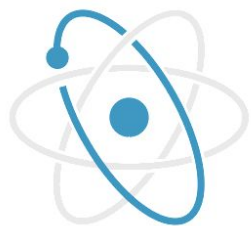

Atomic design is a **methodology** composed of **five distinct stages** working together to create **interface design systems** in a more deliberate and **hierarchical** manner.

It is inspired by the Linnaean system of biological taxonomy and the Atomic Table of Elements.

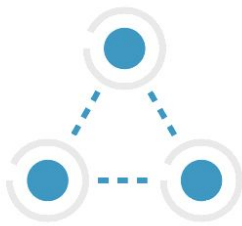

It creates a **“Design System”**.

Why a Design System?

- Inconsistency throughout pages and visual elements
- Hard to train new designer
- Hard to scale design to a new platform
- Your design look the same with other sites
